

# Remote Monitoring that Changes Lives

Working with

**Information for  
clients & guardians**

## What is BoundaryCare?

BoundaryCare is a remote monitoring technology designed to enhance independence, safety, and well-being. We use a specially configured Apple Watch to send reminders, gather wellness information, and collect responses to questions.

BoundaryCare even includes 60 minutes of phone calling per month, so guardians and DSPs are just a call away.

What does the person with the watch need to do? Not much! Just put it on your wrist in the morning and back on the charger at night. Wellness data (agreed to by you and Boundless) will be collected silently in the background.

## Why It's Helpful

Everyone is different, so BoundaryCare will be customized to your needs. Depending on your treatment plan, features like these may be enabled:

- ✓ Fall alerts (letting caregivers or DSPs know about falls)
- ✓ Exercise and diet data collection
- ✓ Wellness data (heart rate & rhythm, oxygen saturation)
- ✓ Medication (or other personalized) reminders
- ✓ Location information (if approved by you)

BoundaryCare uses a specially locked-down version of the Apple Watch. Only approved apps are available on the watch, and it is simple to use.

[AssistiveTechnology@iamboundless.org](mailto:AssistiveTechnology@iamboundless.org)**

Just because it's good for you doesn't mean it can't also be fun! BoundaryCare watches are available in five different colors — black, yellow, red, pink, and purple. Choose the color that feels like you!

## Join the Program

A Boundless representative will discuss the BoundaryCare program with you, and if you agree that it will help you to achieve your goals, Boundless will work with your SSA to have it added to your treatment plan.

You, Boundless, and the SSA will determine what features should be activated for your particular needs. No information is collected without your knowledge and consent.

The BoundaryCare kit can be shipped directly to you (or to Boundless), and your DSP will help you with setup. BoundaryCare works right out of the box!

## How Much it Costs

Costs are typically covered by the Medicaid I/DD waivers (assistive technology). This means there should be no out-of-pocket expenses for Boundless clients or their guardians. If you're not sure you are covered by the assistive technology waiver, check with Boundless.
